HANDS AND FEET

Using **The Gel Bottle inc** Product Range. 100% Gel That Is Of The Highest Quality and Long Lasting. Vegan & Cruelty Free.

Where Medi meets Pedi®

Footlogix is the world's first and only Pedicetical foot care line, offering and innovative foot care products that provide effective and transformational results for a variety of foot related skin conditions.

Traditional methods for hard skin removal have been dominated for centuries by ablative methods such as filing, blading and harsh granular exfoliants. We know from experience that although these methods offer a short-term solution, they do not provide a sustainable approach to skin health or long term results.

Footlogix products use Revolutionary Dermal Infusion Technology to deliver active ingredients into the skin and nails. The unique mousse-based formulas are lightweight, non-occlusive and leave no greasy residue. It is fast acting, non-aggressive, highly concentrated and safe for all skin types, including Diabetics.

If we give our feet the care we give our faces, we will all have perfectly beautiful feet, but beautiful heels and attractive feet come with daily care.

Be sure to use our Footlogix Home Care System along side your In-Salon treatments for continuous results.

WHAT IS DERMAPLANING?

Dermaplaning is a manual exfoliation cosmetic procedure that gently abrades the dead layers of the skin using a surgical blade and aims to diminish fine lines, wrinkles and deep acne scarring, as well as increase the absorption of skincare products.

Dermaplaning is safe for most people, with little risk of side effects when it's performed correctly. This procedure does not require any downtime for recovery, which makes it extremely convenient. It is effective for people looking to make their skin appear brighter, smoother and more youthful.

This treatment claims to remove deep scarring from acne and uneven pockmarks on your skin. It's also used to remove "peach fuzz" the short, soft vellus hairs on your face.

Dermaplaning can be used on any skin type including sensitive skin.

WHAT TO EXPECT

There is no downtime required after a Dermaplaning treatment. You may experience slight redness or feel like your skin has been scraped in the few days after the procedure. As the redness subsides you'll see the results more clearly in the days following.

At no point during the treatment will the hair roots be affected in any way, as we are not changing the structure of the hair follicle, this is why it is scientifically impossible for the hair to grow back thicker or darker after the procedure. When the vellus hair grows back it will continue to regrow as it did before.

As we are removing the top layer of skin it is essential that you protect the new skin surface with SPF50 in the weeks following the procedure, as sun exposure can reverse the effects of dermaplaning or create pigment blotches.

The results from a Dermaplaning are not permanent, the procedure can remove 3-4 weeks worth of dead skin cells, after this time your results will have faded.

WHAT IS MICRONEEDLING

Microneedling is a minimally invasive cosmetic procedure that is used to treat skin concerns such as acne scarring, pigmentation, uneven skin tone, loose skin, fine lines and wrinkles, pore size and stretch marks.

Microneedling is designed to create superficial puncture wounds into the epidermal layers of the skin to traumatise the skin without collateral damage, this will stimulate the body's natural healing process to help with the production of collagen and elastin to help repair, rebuild and restructure.

Microneedling isn't invasive like surgery, requiring no downtime. It's considered safe for most people who are in overall good health. The procedure is not safe for people who use certain medication or for pregnant women.

You'll experience minor redness and irritation for a few days after the procedure. Your skin will also be more sensitive to the sun, so SPF 50 is a must.

HOW DOES MICRONEEDLING WORK?

Microneedling works by encouraging the skin to produce more collagen and elastin. The idea is that a dermaroller will repeatedly penetrate the skin creating thousands of tiny microchannels that the skin perceives as micro wounds, causing slight injury the skin responds by making new collagen-rich tissue.

This new tissue is, in turn, more even in tone and texture and the results is smoother, healthier and younger looking skin.

TARGETED AREAS FOR MICRNEEDLING

- Acne scarring
- Age spots or "sun spots"
- Fine lines and Wrinkles
- Other types of scars
- Pigmentation
- Large pores
- Reduced skin elasticity
- Uneven skin tone and texture

To maintain the results of your treatment you will need multiple sessions and perhaps other complimenting treatments.

We will advise you on the best plan of action based on your individual goals.

MILLION DOLLAR PEELS

THE IMMACULATE COLLECTION

Whilst there is a wide choice of peels on the market, we at Million Dollar Facial wanted to bring something that was a bit different. By combining a potent blend of chemical peel acids along with clinically proven active serums, we have created an ultimate power boosting duo!

This innovative peeling system works by exfoliating the build up of dead skin cells which in turn allows the acids to target specific problems. This exfoliation will allow for the increase in absorption levels allowing each power product to further target any concern areas.

Each of the 3 peels has a unique blend of acids that has been formulated to specifically target a number of skin concerns. The 3 peels are all backed by scientific and clinical evidence, allowing the results to speak for themselves

Eliminate Peel 26% – Helps to calm, heal and restore the skin creating a healthy glow.

This peel is suitable for all skin types, sensitive, problematic, dry, oily and combination. Also, for inflamed Acne, plus blackheads and comedones. The skin will benefit if you suffer from rough skin texture and enlarged pores.

Radiate Peel 38% – This peel is perfect for uneven or pigmented skin tones.

Uneven, photodamaged, acne scarring or age spots. This peel can also target fine lines and dull skin. This will give the skin a beautiful radiant glow.

Rejuvenate Peel 36% – The perfect peel to target and slow the aging process.
